

Concurrent Workshop 1: Publishing Platforms & Services for Diamond OA

redalyc AmeliCA
UAEMEX

PhD. Arianna Becerril García
Professor, Autonomous University of the State of Mexico
Executive Director, Redalyc
President, AmeliCA

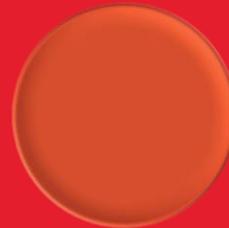

3rd Global Summit on Diamond Open Access

2-6 Feb 2026 | Bengaluru

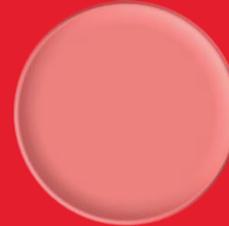

<https://www.diamondoasummit.org/>

SCIENCE, A GLOBAL PUBLIC GOOD

Main challenges

Shared Responsibility

**Recognition in
Research Assessment**

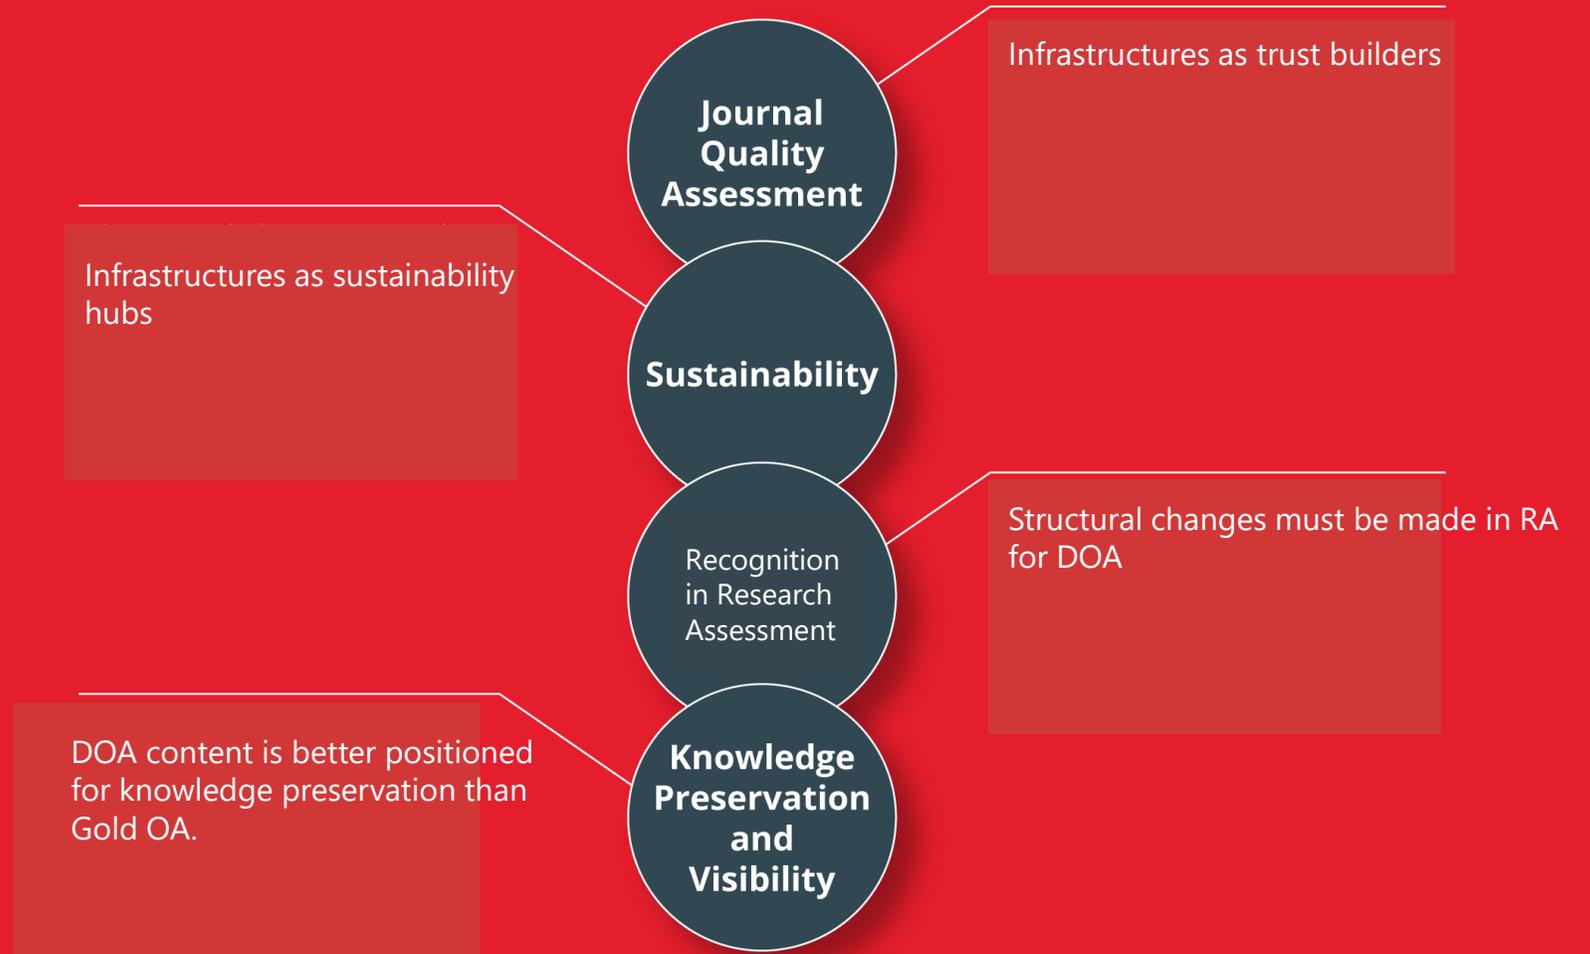

SCIENCE, A GLOBAL PUBLIC GOOD

Main challenges

- **Science based on a community-owned and non-commercial** approach so knowledge circulates freely and equitably.
- **Current commercial publishing paradigms hinder universality and fairness**, reproducing exclusion instead of fostering global scientific participation.
- **Digital infrastructure and collaborative models** are essential but need sustainable support and recognition to scale and truly realize the ideal of science as a public good.

SCIENCE, A GLOBAL PUBLIC GOOD

Key factors for the future of DOA

Thank you
